At the gala awards ceremony on September 25th, DG Project Management and ProCad Designs were awarded the prestigious Gold Keystone award for best residential renovation in the \$200,000 and above category. This renovation was designed by ProCad to maintain the neighborhood character while increasing usable floor space, transforming the interior, and creating an open floor plan.

Before

- ✍ Updated the 1960's street face to blend into the Craftsman style 1940's era neighborhood with a modern feel and a distinguished front elevation.
- ✍ Increased the usable space on the second floor with the incorporation of a Master Bedroom and adjacent full bath, and second bedroom.

After

- ✍ Re-envisioned the traffic patterns and space of the first floor with an open concept for the kitchen, dining room and living spaces.
- ✍ Reclaimed the basement space with a sound insulated media room, laundry room and storage area.
- ✍ Reconnected the indoor living space to the backyard with natural wood decks.
- ✍ Used natural wood products extensively.
- ✍ Increased insulation values in the roof; a high-efficiency heating and cooling system and high-efficiency windows throughout.
- ✍ Combined outdoor and indoor space with a private deck on the second floor.

The renovation was constructed by **DG Project Management**, a design oriented, high-end **New Home and Renovation** company, working with environmentally conscious clients, wishing to incorporate valuable energy saving features into a new home or renovation built around their lifestyle. We are for the discriminating client wishing to down-size or reduce their impact on the environment, while working with a low pressure, full service construction company.
